

Technical Committee on Universal Design

For Easy-To-Use Products For All The People

1. Goal

Development and spread of easy-to-use products for all the people in which the needs of the aged and the handicapped are considered.

2. Problem

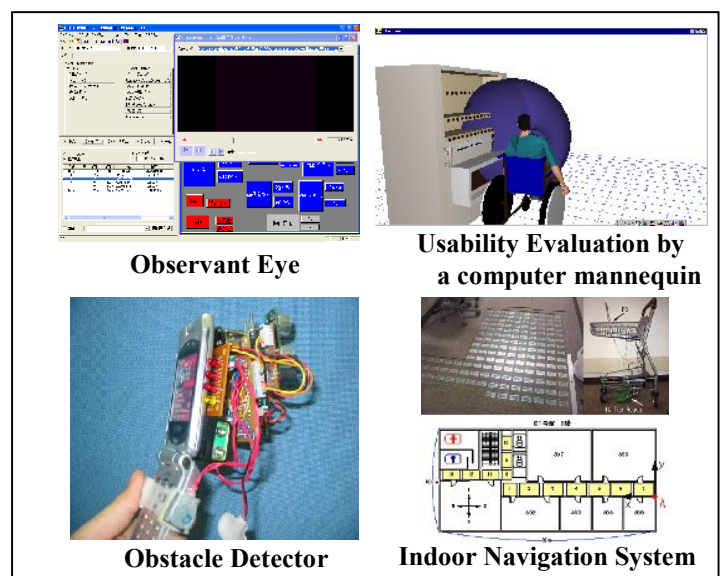

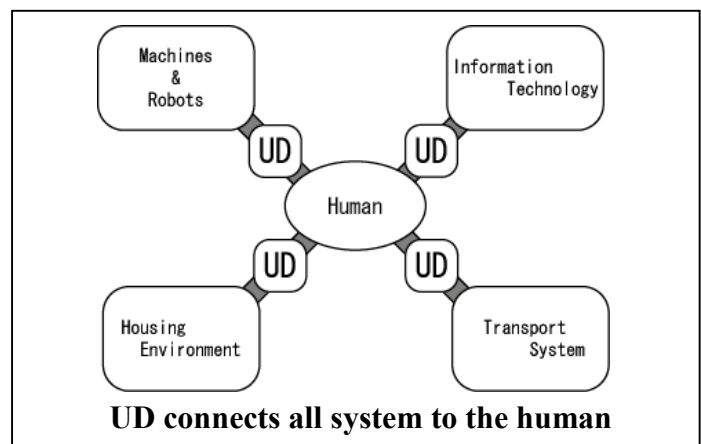

- We clarify what is “Usability”. We develop the machinery and the information system from a viewpoint of “Usability”, and explore the basic technique for it.
- Make a machinery product easy to use and safe.
- Make a friendly human machine interface.
- Development and spread of the design method of universal design.
- Usability Evaluation
- Human Machine Interface
- Transport System, Housing Environment System
- Lightening, Rise in Safety, Manual less

3. Strategy

- Enlightenment by planning lectures, seminars and organized sessions to study of universal design.

4. Activity Plan

- Planning organized session and idea contest for universal design.

Organizers (2009)

Director: Noriyuki Kawarazaki (Kanagawa Inst. of Tech.)
 Vice-director: Takayuki Tanaka (Hokkaido University)
 Secretary: Tadashi Yoshidome (Kanagawa Inst. of Tech.)
